Subject: RE: WV chemical spill

It is my understanding that the WV American lab did the first round of tests yesterday. GC/MS is the method, but I have no other details. Here is a contact:

WVAWC - Weston

1243 US Highway 19 South

Weston, WV 26452-8207

Billie Suder

(304) 269-4272

Civil support team also doing analysis.

Subject: WV chemical spill

Patti-Kay,

Apparently, FEMA has asked us to put together a Scope of Work for an assessment.

It will be generic but I am predicting that, if we collect samples, we'll need to know what to analyze for, what method, etc.

Per Karl, Dupont is analyzing samples at their treatment plant downstream and he is trying to get info from them.

My question: Do you know who has analyzed for the chemical to date, what compounds of the mixture were analyzed for and methods they are using?

Thanks.

Jack
